# Sponsorship Prospectus

What is FrontierHacks?

Each year, FrontierHacks aims to support the community by partnering with a local, prominent nonprofit. This year, FrontierHacks is proud to partner with SMYLE (Student Mentors for Youth Learning & Education), a nonprofit organization devoted to giving back to student communities.

In November, we will be inviting 150 students from all over the Bay Area to come build their own innovative projects for 24 hours, whether that be a hardware hack, web hack, mobile hack, you name it!
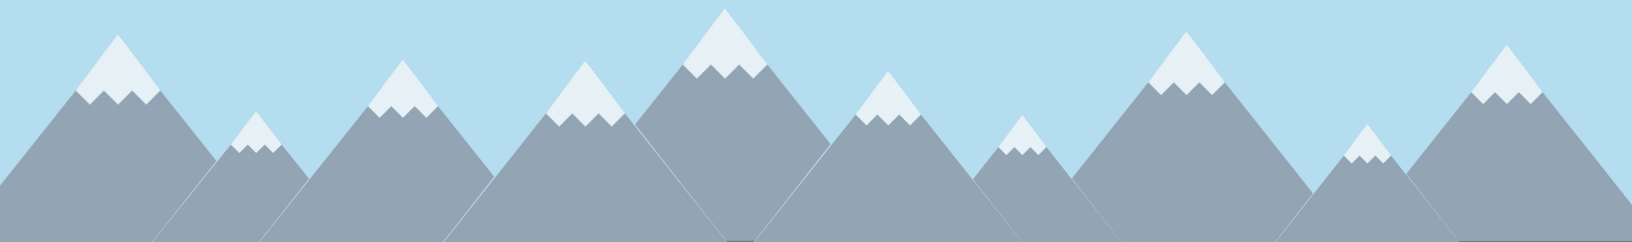

Why sponsor us?

Sponsors will have an amazing opportunity to connect and interact with the next generation of programmers and entrepreneurs. Your company will be able to teach and reach out to these students, effectively advertising your products and making a lasting impact on them. The resources you provide and what you teach will greatly influence what languages, APIs, and other tools these developers will utilize in their future ventures. Additionally, you could send recruiters to search for interns and other talents.

Other ways to help

- Provide mentors to teach and guide students
- Sponsor a meal, snacks, or drinks for the hackers
- Support students with resources to use (ex. APIs and hardware)

Interested?

Send us an email at team@frontierhacks.org. Please know that the tiers below are negotiable. If your company would like a more personalized package, we would be more than happy to work with you to create a custom sponsorship deal.
